

Maryland Department of Agriculture Update

3:00pm – 3:25pm

This presentation will provide you with important regulation changes that are on the horizon as well as information on the Maryland 2021 USDA Pesticide Use Survey. The goal of this session is to leave you with accurate and timely information to help you stay in compliance and provide you with resources during these new and unprecedented times. MDA's Pesticide Regulation team continues to adapt to changing conditions and is still open for business!

Presented By: Kelly Love, Maryland Department of Agriculture

Kelly M. Love is representing the Maryland Department of Agriculture's Pesticide Regulation Section (PRS). She has spent seven years with the Department and currently serves as an Agricultural Inspector Supervisor. In addition to her Inspector duties, Kelly has been leading the Certification and Training Program for the PRS since December of 2019. In March of 2020, when the pandemic caught all of us off guard, there were only two phones set up to take calls for the Pesticide Section, and her's was one of them. If you called MDA/PRS for any reason from March until July, you probably have spoken to Kelly.
