

Safety/Label is the Law

8:00am – 8:55am

This session will review the most used postconstruction and preconstruction termiticide labels. We will discuss personal protective measures, worker protection requirements, applications around wells and supply lines, and other factors that may impact applicator and customer health and safety. We will also discuss equipment safety and spill management.

Presented By: Richard Kramer, Kramer Consultants

Richard D. Kramer, Ph.D. is a graduate of the University of Florida with a BS in Agriculture (Entomology), MS in Veterinary Entomology and Ph.D. in Urban Entomology. Most recently for 14 years he and his son, Josh, owned and operated Innovative Pest Management, which was sold at the end of 2018. Early in his pest management career he served as an entomologist in the U.S. Army for 22 years. For five years after retirement, he was the Director of Research, Education and Technical Resources for NPMA. After leaving that position, he was an industry consultant for 2 years and subsequently the technical director for American Pest for 8 years. He has authored many training manuals including the PCT Technician's Handbook.

Richard has spent over 30 years troubleshooting termite work for NPMA members, as a consultant, as a company owner and as an expert witness defending many pest management companies in the DMV area.
