

A Comprehensive RPM Approach to Rodent Control

Thursday January 27, 2022 3:05pm-3:55pm

During this session a comprehensive PRM approach to rodent control will be discussed. With the need for rodent pest management, it is important to discuss detection of rodent signs and determining how to bait and trap. Trisha will provide a list of ways to reduce these pests as well as monitoring and maintenance.

Presented By: Trisha Schellenberger, Bell Labs

Trisha has been in the industry for over ten years. She has resented educational and practical rodent control programs implementing the latest IPM practices in the Eastern U.S. She has also Instructed PMP's on proper methods of integrating rodent control tools into a successful and comprehensive Rodent Control Program. Trisha has provided technical expertise in assisting PMP's to develop Rodent Control Programs in several situations, including urban and rural areas where IPM Practices assure the best solution in sensitive areas. Have performed comprehensive inspections of all types including food facility, farm operations, hospitals, educational facilities, and all types of residential settings.
